

# User Guide

eRemote HA

## LinknLink Pty Ltd

Manufacturer: Hangzhou LinknLink Technology Co., Ltd.

Address: 7 Fairyland Ave, Chatswood West, Sydney,  
2067 New South Wales, Australia

Website: [www.linknlink.com](http://www.linknlink.com)

Service & Support: [support@linknlink-iot.com](mailto:support@linknlink-iot.com)

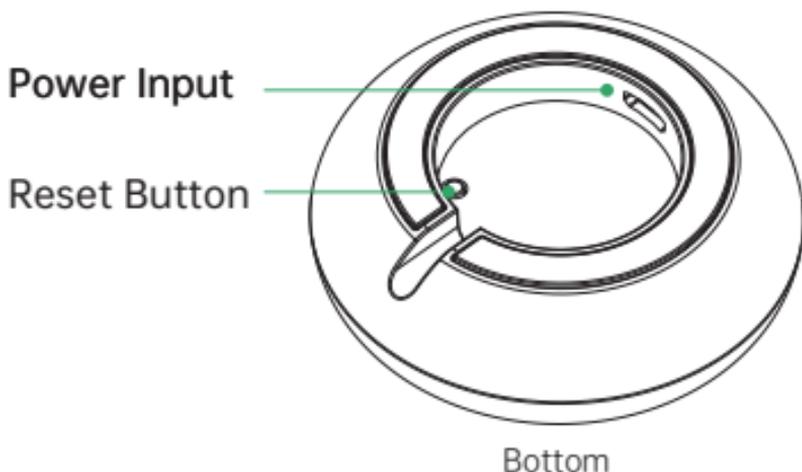

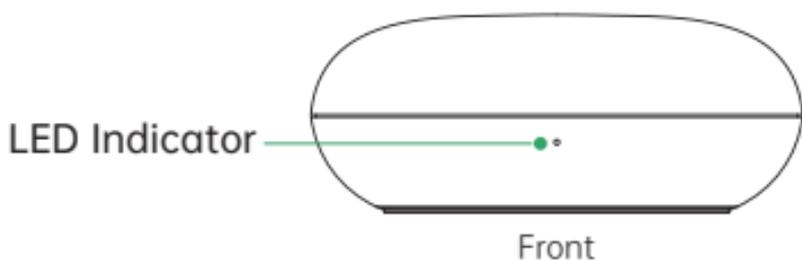

## Part 1 OVERVIEW

### 1-1 What's Include

eRemote Hub x 1, USB cable x1,  
User guide x1.

#### ● eRemote HA

size: 61 x 61 x 25 mm

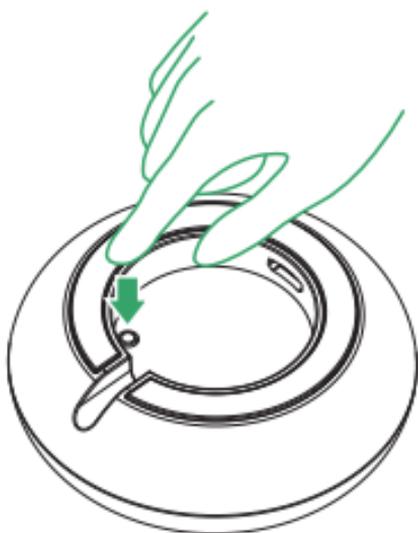

## 2-1 Indicator Light Status

Status	Indication
Flashes intermittently (flashes 4 times and pause a while)	Device is in setup mode and waiting to be added. (Red: Change Wi-Fi only; Blue: Factory reset)
Flashes slowly then off	Device is being set up and added to network
Flashes slowly continuously	Device is failed to connect to network or disconnected from network
Flash once	IR signal is sent

### Reset for Setup

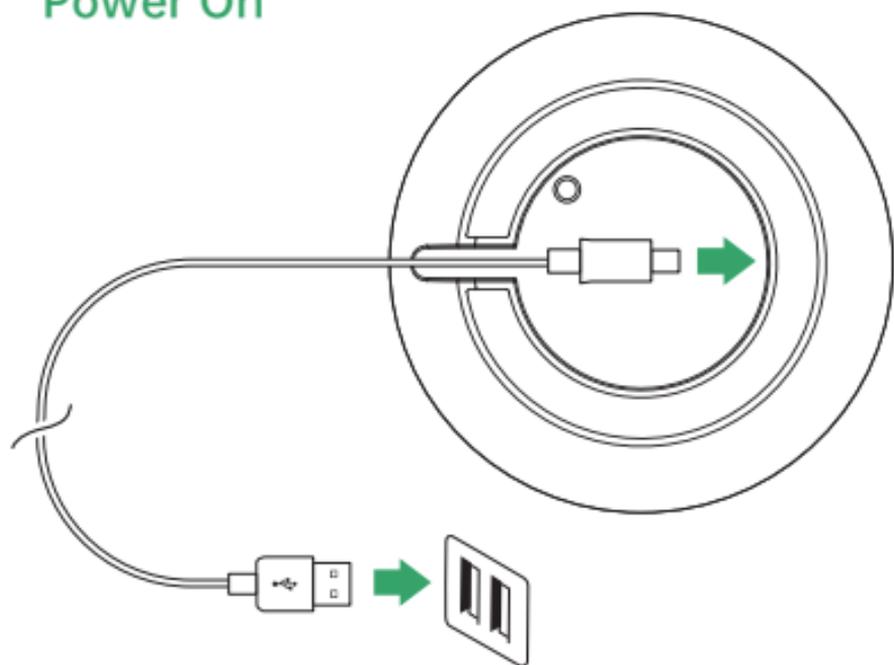

- To perform a factory reset, press and hold the Reset Button for 5s until the LED flashes red intermittently.
- To change the Wi-Fi network but keep settings, press the Reset Button briefly 3 times within 3s until the LED flashes blue intermittently.

## Part 2 PREPARATIONS

### 2-1 Prepare Setup

#### Power On

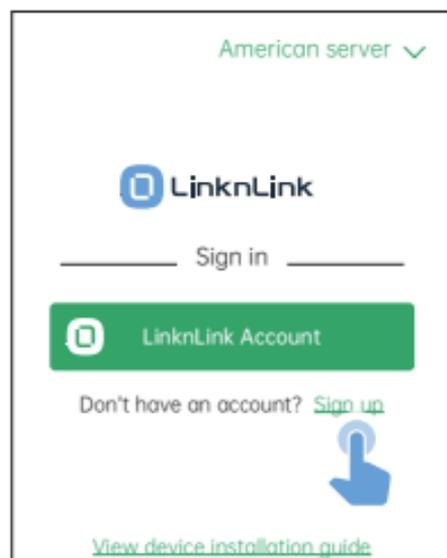

5V USB Power Source

- Power on the eRemote using a 5V USB adapter.
- If you want to use the IR devices in Home Assistant (HA), add the "MQTT" integration to your HA and configure it to be ready for connections.
- \* **[ Important ]** The eRemote and HA instance must be connected to the same LAN.

## 2-2 Download App and Sign In

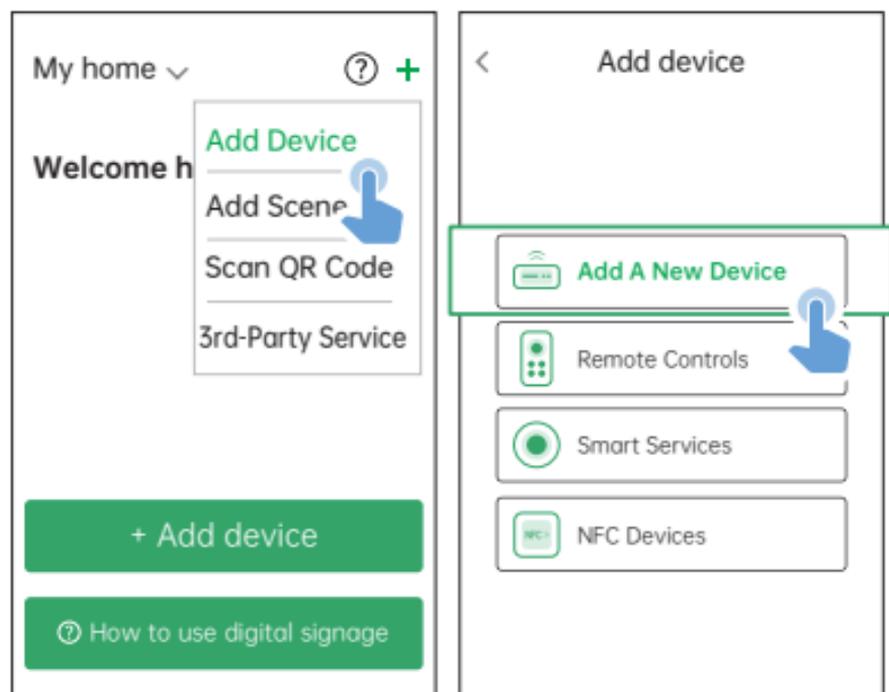

### Wi-Fi Router with Internet Access

- Connect your smartphone to a 2.4GHz Wi-Fi network.
- Download the latest "LinknLink" App from the App Store or Google Play or scan the QR code to download and install.
- Open the LinknLink App, select a server from the top-right corner and sign in, or create an account if you don't have one.

## Part 3 ADD EREMOTE TO APP

### 3-1 Start to Add

- Power on the eRemote, **making sure the indicator light is Flashing intermittently in blue.**
- Turn on your phone's Bluetooth service, click on the "+" in the top right corner - "Add device" - "Add a new device" - "eSeries Hubs & Sensors" - "eRemote".
- The APP will start to automatically scan for nearby eRemote devices, which may take up to 10 seconds.

## 3-2 Set Up Device to Wi-Fi

< Connect to Wi-Fi network

Choose Wi-Fi    Use hidden Wi-Fi

Select name of Wi-Fi network ▾

Enter password 

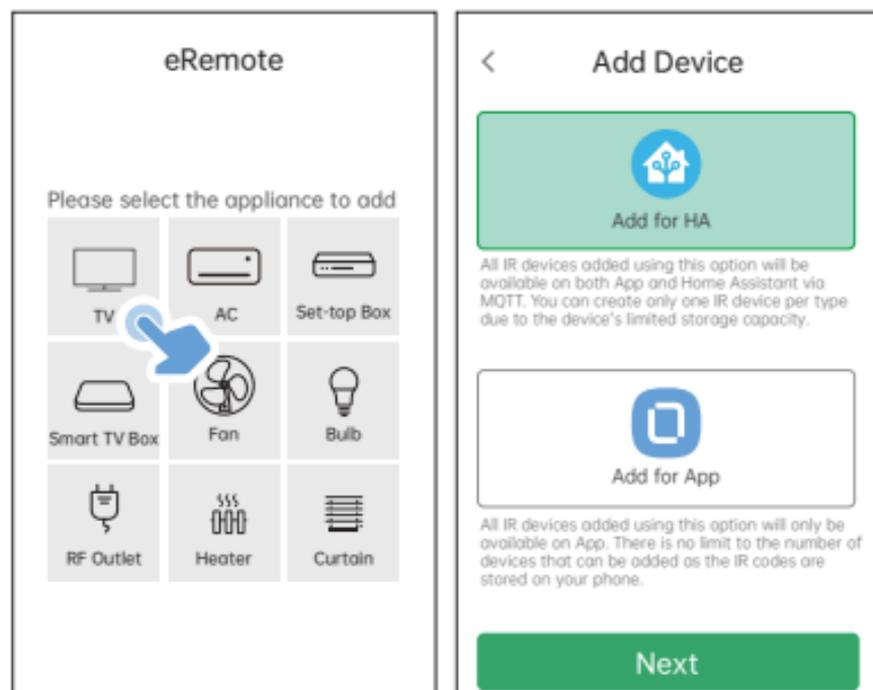

**Connect now**

- Select your home Wi-Fi network, enter the password and click "Connect now", the LED indicator will **flash slower and then turn off**.
- Device is successfully connected.
- Choose a room and name the device.

## Part 4 ADD IR DEVICE TO EREMOTE

### 4-1 Add with Auto-Matching

- Click the "+" icon in the top-right corner and select an appliance type (e.g., TV).
- To control your IR device using both the app and HA, select "Add for HA".
- Follow the wizard to select the brand, test the IR options, and save your settings. You can then control the device from your phone

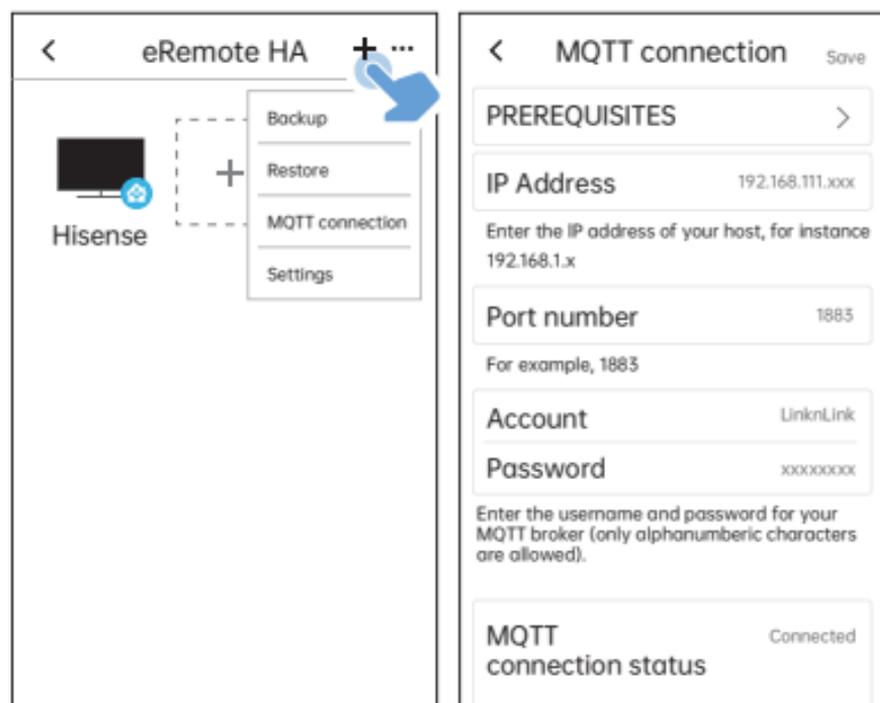

## 4-2 Add with Manual-Learning

<p>Cancel      Add Device</p> <hr/> <p>No IR option from top 3 matched your appliance</p> <p>Click "Learn remote control now" to create a remote panel. Or click "Button match" to try other options that may fit your appliance.</p> <p><b>Match Button</b></p> <p><b>Learn Remote Now</b></p>	<p>Cancel      Add Device</p> <hr/> <p>Button learning can copy the keyfunction of the remote control to the intelligent remote control, so that the intelligent remote control can replace the remote control to directly control the electrical appliances.</p>  <p>Please prepare the electrical remote control first.</p> <p><input type="radio"/> Do not show again</p> <p><b>Start learning</b></p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

- If no IR options match the selected brand, click "Learn Remote Now" to create a blank template.
- Assign a room and rename the device to continue, then click "Use Device Now".
- Click the grey buttons and follow the wizard to manually learn the IR code using your physical remote.

## Part 5 SYNC IR DEVICE TO HA

### 5-1 Configure MQTT for HA

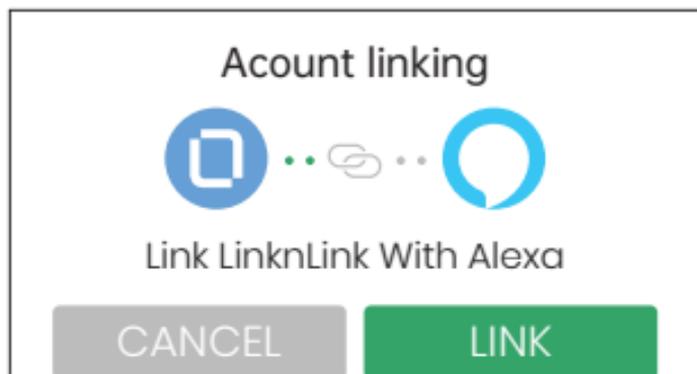

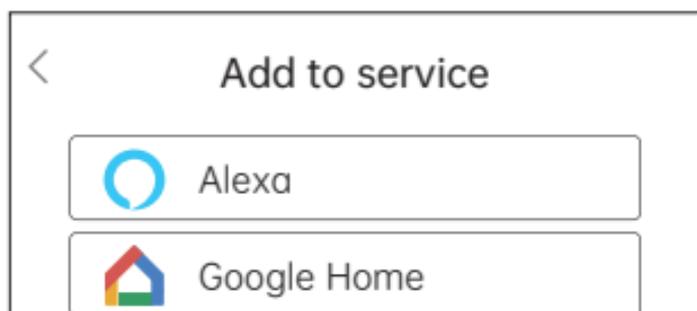

- Return to the eRemote HA device page. Click the ".." icon in the top-right corner, then select "MQTT Connection."
- Enter the required information based on your MQTT server settings and click "Save" Reopen "MQTT Connection" to verify that the status shows "Connected".

## 5-1 Control IR Device in HA

The screenshot displays the Home Assistant interface for a Samsung TV. On the left is a sidebar with navigation options: Home Assistant, Overview, File Editor, Map, Energy, Logbook, History, HACS, Media, To-do lists, Developer tools, Settings (highlighted), and Notifications. The main area is titled 'Samsung' and shows the device 'TV from aRemote by LinkLink' in the 'Living Room'. The 'MQTT' connection status is shown as 'MQTT INFO'. Below are sections for 'Automations' (no automations added) and 'Scenes' (no scenes added). The 'Configuration' section lists various buttons: back, channel\_down, channel\_up, down, fast\_backward, fast\_forward, home (highlighted), left, menu, mute, next, and ok, each with a 'PRESS' label. A 'Logbook' on the right shows a history of MQTT events for November 25, 2024, such as 'Samsung home changed to November 25, 2024 at 5:27 PM triggered by action Button: Press'.

- Once MQTT is connected, the added IR device will automatically appear in your HA, with the available buttons synced and ready for use.
- You can now use the IR device in HA for complete local automations.

## Part 6 ALEXA/ GOOGLE VOICE CONTROL

- If you're already logged into the Alexa or Google Home APP, you can now directly link to the LinknLink skill.
- On the App homepage, click on the "+" in the top right corner and select "Add Voice Assistant". Select "Alexa" or "Google Home", then click "Link Now".
- You will be redirected to the Alexa / Google Home APP and click "Link" to complete this process.
- After successfully discovering the device, you will be able to control the device through the Alexa / Google Home APP or speaker.
